How Much Time Do I Need to Spend on My Business?

Well you probably expect me to say that the more time you put in, the more success and results you’d have- and that’s probably not too far from the reality. However, there are a few things I will say. The first thing is it’s all about how you spend your time and the biggest advantage when it comes to time and working with us is that we’re going to show you how to focus on money-producing activities - stuff that’s really going to have an effect on you and put money in your bank account.

In other words, it’s going to get you results as quickly as possible and we’ve had many students over the years who have said they’ve spent hours and hours every day on the internet trying to get results-sometimes for years. In fact they’ve really struggled and then they’ve come and found us and put fewer hours into the business and had a lot more significant results than what they’ve ever had before. So the point I would say is it’s about how you spend your time firstly, but I would say be realistic.

You know, if you don’t have at least an hour a day- most days- to start with you’d probably be wasting your time. A couple of hours a week is just too sporadic, it’s too random. The internet is fast-moving, our training is fast-moving, we’re always keeping you up-to-date so you want a good amount of momentum. And I would actually say consistent time spent on the business is more important in many instances. And the amount of time I’d say between ten (10) and twelve (12) hours a week is adequate. Of course if you can find more it’s going to assist you, particularly in the beginning stages. But we’re going to certainly guide you in terms of that, and most importantly the things that you should really be focusing on to get results.
